Building Project Update (Next Bulletin and Messenger publications)

The Pastoral Council has discerned to re-form a Building Project Feasibility Study Committee to refresh the feasibility study that was last conducted in 2013. The goal of the group will be to make a recommendation to the Pastoral Council whether to proceed with a capital campaign to fund a building project and, if so, the general parameters of the recommended building project. The Pastoral Council continues to believe that additional facilities, including meeting space, multi-purpose rooms, recreation areas, classrooms and additional office space, are needed to realize the vision of our parish. The Pastoral Council has approved engaging Groth Design Group to update past assessments of church facility needs, church addition schematics and to prepare other presentation materials necessary in support of updating the past feasibility study using funds recently donated to the parish for this intended purpose. Updates on the progress of updating the feasibility study will be provided as milestones are reached.
