
RTI

Response to Instruction

The goal is to identify student need, provide early intervention for struggling students, and make decisions based on student progress data.

Tier 1: Designed for all learners and meets the needs of 80% of students.

Tier 2: Intensive small-group instruction designed to increase student growth.

Tier 3: Referral for diagnostic testing to determine the presence of a disability. More intensive special education services provided.

Meeting the Needs of All Learners

We provide differentiation for identified students inside the classroom, in small groups, and one on one with two full time teachers and a full time assistant.

Multi-sensory Teaching Approach

We use techniques and strategies with a multi-sensory approach that stimulate learning.

- ❖ Auditory Processing
- ❖ Visual Processing
- ❖ Tactile
- ❖ Kinesthetic Learning (incorporating movement)

Incorporating Technology

We implement programs that build skills and concepts specific to the needs of the individual student.

WILSON Reading System®

St. John the Baptist School incorporates a highly structured remedial program that directly teaches the structure of the language to students and adults who have been unable to learn with other teaching strategies or who may require multi-sensory language instruction.

- Offers a research-based program with more than twenty years of data collected and analyzed from school districts implementing the program.
- Provides a systematic and cumulative approach to teach total word structure for decoding and encoding.
- Follows a ten-part lesson plan that addresses decoding, encoding, oral reading fluency, and comprehension in a sensible and logical fashion.
- All instruction is multi-sensory and interactive.
- Uses a unique "sound tapping" system.
- Uses criterion-based assessments built into the program to measure student progress and success.

Maze to Success

As educators and parents, we know the ability to learn efficiently and effortlessly is one of the crucial foundations of success.

Success Requires

Sensory, Motor & Neural-Development

A growing body of mainstream scientific research clearly identifies the critical role that sensory/motor/neural development plays in the learning process.

MIM is a 15 step obstacle course that is designed to develop and challenge a student's balance and learning capabilities.

Our school is now offering the

Minds In Motion (MIM)

to all of our K-5 students daily!
