

Good News!

Bottle Caps

Please Read

Your Creation Care Team here at St. Anselm has continued to work throughout these unprecedented times and we now have a solution to our bottle cap predicament.

We have met with Mazza Recycling on Shafto Road where all the recyclables for Monmouth County are recycled. They have a new facility that can accommodate bottle caps as long as they **REMAIN ON THE BOTTLES!**

We will collect all of the caps you have been saving for this past year and Mazza will take them from us as a **ONE TIME ONLY GESTURE.**

From now on, please leave caps on your bottles and dispose of them in your recycling bins at curbside.

During the week of **OCT. 23RD TO 31ST, 2021**, there will be a bin to collect your saved caps at the door closest to the auditorium. After that, the bin will be removed and we will no longer be collecting caps.

We thank you for your cooperation this past year in helping to keep thousands of bottle caps out of our landfills.
