FOOD FOR THOUGHT

St. Augustine is widely considered to be one of the most significant Christian thinkers in history, thanks to his extensive theological writing.

He was born in 354 AD in Tagaste, a Roman community located in modern-day Algeria, just 40 miles from the African coastline. During this time, Christianity was beginning to spread from its major following in the Middle East. However, during Augustine's childhood it hadn't yet become the official religion of the Roman Empire.

Augustine's family was fairly well off and his parents ensured that he received an excellent education. He became a highly capable scholar who traveled around Africa and Italy pursuing his studies. But as he grew older, his life became more tumultuous. Somewhat bizarrely for a future saint of the Catholic Church, Augustine had a few relationships with concubines and even enjoyed a lengthy affair with a woman he didn't end up marrying. This union resulted in the birth of an illegitimate son, Adeodatus, in 372 AD.

Eventually, after years of studying and toying with Christianity, Augustine saw the light and converted at the age of 31, in the year 386 – six years after Catholicism became the Roman Empire's sole official religion. He spent the rest of his life preaching and writing out his thoughts on Christianity in several books, including *The City of God* (426 AD). Unlike other early Church fathers, **St. Augustine's** five million written words survived the ravages of time. He is most celebrated for his adaptation of classical Greek and Roman thought into Christian teaching, which cemented his influence as one of the Church's most esteemed thinkers.
