

Building Project Update – Design Programming Kick-off! (Next Bulletin publication)

While the capital campaign for the church addition project is still underway, we have recently started the first steps of the design process for our building addition. We have done so because of a desire to be on a schedule to start construction in spring '18. Plunkett Raysich Architects was selected as our project architect and CD Smith Construction as our construction manager following a rigorous proposal and interview process last fall. More recently we have initiated the process of reaffirming our space needs in the programming phase gaining input using questionnaires completed by many ministries and also with small group interviews. The programming, schematic design and design development will continue through the summer and into the early fall. Please pray for the success of our capital campaign and guidance from the Holy Spirit about your personal support of it with your time, talent and treasure.
