Building Project Update – Design Programming Kick-off!

While the capital campaign for the church addition project is still underway, we have recently started the first steps of the design process for our building addition. We have done so because of a desire to be on a schedule to start construction in spring of 2018.

The Building Committee met with the project's architect on June 29th to review three building plan concepts based on our programming input. From these concepts the Building Committee will be giving the architect direction to proceed with a schematic design in July to refine the layout. The schematic design and design development will continue through the summer and into the early fall. Please pray for the success of our capital campaign and guidance from the Holy Spirit about your personal support of it with your time, talent and treasure.
