

## **The War on The Unborn and It's Legalization of Abortion**

It's been over 50 years now that we have been living with the evil of abortion. Abortion is the legal killing of an unborn baby. One must shake their head and wonder how did we ever let this happen?

Following are a **few** of the players involved in making abortion legal.

First, we do know that **NARAL** (National Abortion Rights Action League) played a significant role in making this happen.

**Dr. Bernard Nathanson** as co-founder of NARAL, admits the use of deceptions, dirty tricks, and other tactics, is what helped make abortion legal and socially acceptable. He became Director of the world's largest abortion clinic and was the most prolific abortionist in the nation. Nathanson presided over 60,000 abortions. Although born Jewish he practiced Atheism for a number of years. In 1979 he turned against abortion, realizing he was taking a human life. This change of view he attributed to science. He then became a Pro-lifer. In 1996 he was Baptized and Confirmed a Catholic on the Feast of the Immaculate Conception. That same year he wrote about his conversion in the book "The Hand of God." It was said he chose the Catholic Faith as he felt the Sacrament of Confession guaranteed forgiveness so he could enter heaven. He died in 2011.

**Norma McCorvey** the plaintiff in Roe v Wade had 3 children and adopted out all three of them. When abortion became legal, she had already given birth to her first child. Later in life she regretted her role in legalizing abortion. She even asked the Supreme Court to reverse the ruling, but it was denied. She too became a Catholic during her Pro-Life years.

**The Devil**, who is the greatest deceiver of all time. He clearly played a major role during the legalization of abortion. However, he may have some wins, but in the end God will prevail. **Trust in God! Pray to end abortion!**
