

A Digital Care Package for AAA Clients and Caregivers

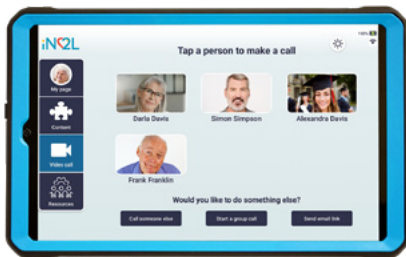

The iN2L tablet takes the guesswork out of selecting technology that best meets the needs of older adults. Offering the ultimate personalized connection and engagement experience with an easy-to-use interface, senior-friendly connection tools, and an expansive content library that supports endless hours of enjoyment, the iN2L tablet is the ideal choice for your clients and their caregivers.

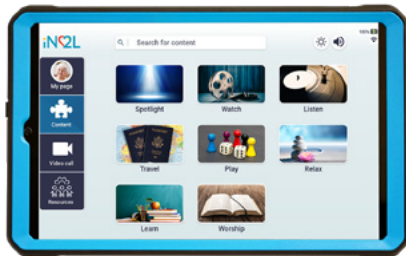

Senior-Friendly Design

Specially designed for seniors with simple picture-based screen layouts, easy navigation prompts, large font, and more, the iN2L tablet is the device they'll feel confident using. Users will benefit from the tablet's quick access to common resources, favorite content, and safe Internet browsing.

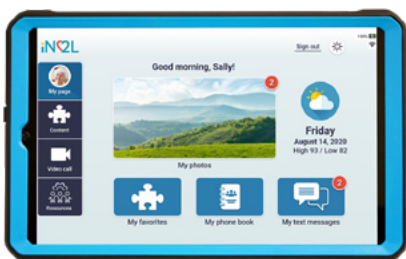

Easy Social Connection Features

Help clients and their caregivers feel less isolated. The tablet's easy social connection features enable users to video call family and friends, attend telehealth visits, and enjoy photo and message sharing. Built-in social network creation encourages call recipients to send photos and messages to the tablet after each video call session for seniors to enjoy.

Purposeful Engagement Content

A sense of purpose promotes good days and keeps restlessness, boredom, and feelings of anxiety and hopelessness at bay. The iN2L tablet comes pre-loaded with more than 1,200 games, puzzles, movies, audiobooks, and other content created specifically for older adults. Regular content updates from iN2L ensure endless opportunities for learning, enjoyment, spirituality, and wellness.

A Personalized Experience

The iN2L tablet arrives personalized for each client, ready to support their personal connection and engagement goals right out of the box. A tablet homepage welcomes them by name and provides a centralized area for personal photos, contacts, and messages. Users can also save favorite content items and Internet sites for easy access.

Older Americans Act funding is available to help AAAs combat social isolation with technology.

If you're interested in partnering with iN2L to support your clients and their caregivers with senior-friendly tablets, contact us today.
