

Trusted to Inspire. Honored to Educate.

At St. Peter Catholic School, we are honored and humbled by the trust parents place in us to educate and inspire their children.

The formative years at St. Peter are about more than learning English, math and science—they're about growing in an environment where Catholic teachings are seamlessly woven into the curriculum. These teachings reinforce values, build strong moral character, and inspire positive habits that last a lifetime.

Our play-based approach in 3K, 4K and 5K sparks a lifelong love of learning. During these magical early years, children's curiosity blossoms, and they begin to develop critical thinking skills. They also learn to see themselves as gifts from God, practicing acts of goodness and kindness as part of their everyday routine.

With an average class size of 13, each child receives the individual attention they need to thrive. In grades 1-5, a robust curriculum includes religion, science, social studies, Spanish, technology integrated across subjects, and strong math and English Language Arts instruction. This prepares students exceptionally well for middle school, high school, and beyond.

Come see what sets St. Peter Catholic School apart—a community where children thrive spiritually, academically, and personally.
