Computer/Technology

Our students are offered a wide range of technological services. In addition to the classroom computers a laboratory of desktop computers is available. One of our goals at Holy Family is to offer computer instruction and to provide software programs that will assist the academic development of our students.

Our school offers internet accessibility. This technology program is designed to supplement and integrate the classroom instruction. Teachers will provide additional information on the programs and software used in the classroom and Laboratory. Parents are required to sign an acceptable use policy acceptance form provided at the beginning of each school year.
