

Dear Parents,

All students in grades K to 5 have been registered for a school account on First in Math. First in Math is used in school and can be used at home; it is aligned to the Common Core standards. From basic math practice to building on problem solving and critical thinking skills, students can work at their own pace while earning as many stars as possible. Students may login on the First in Math website from any device with internet access.

To login, visit www.firstinmath.com and login with your user name and password. Please use the AlternateID and password options.

Student logins all begin with nd, followed by their first name and last initial. Student passwords are the login plus the grade number.

- For example, if Sara Brown is in Kindergarten, her login is ndsarab and her password is ndsarabk.
- Joshua Sein is in 3rd grade. His login is ndjoshuas and his password is ndjoshuas3.

Due to duplicates there are a few exceptions. These are as follows:

- Anna Benedetto
 - login- ndannab
 - password- ndannabka
- Ava Clee
 - login- ndavac
 - password- ndavacka
- Julia Barbier
 - login- ndjuliab
 - password- ndjuliab4b
