

Haiti – House #133 Liface Luc

Mr Liface and Maritane live by the little farming they can do. Unfortunately, they are both struggling with sicknesses. He had a stroke a few years ago. Since then, walking is very painful. She suffers from heart problems and considers the hospital as a second home. Their home was destroyed by Hurricane Matthew in October 2016. The blue plastic cover they used to make a roof has deteriorated by the effects of the sun and elements. The HMI selection committee decided that it is time to help them move to a decent place to live out their days. They send their deepest appreciation and love to all who filled their final days with the joy of a beautiful new home.
