

Haiti - House #148 The ILena Dominique Family

ILena Dominique lives with her brother. (pictured are both of them with one of her nine children and one of her five grand children.) Since Hurricane Matthew in October 2016 destroyed the previous place she lived, she lives in the "before" house with children, a grand child and her brother. They live mostly on farming a small piece of ground located in Bec's s/d. Fr. Joe visited her with the Fakier group in the summer of 2018. Her property is located in a very difficult area to access with the necessary trucks to bring material for the construction so they asked her to try to get help to fix the road leading to the area where the new house was to be built. By the grace of God and the help of her friends, she did it! Now, HMI could make good on our promise. Fr. Joe also encouraged them to come to church on a more regular basis to thank God and pray for the donors that have made this possible which they have done!
