

House # 15 - Venicia Joseph House

When looking at the pictures of where Mrs. Venicia Joseph is staying, it is hard to say that she is “living” there. Lame from birth, Mrs. Venicia has walked the considerable distance to the Church of Our Lady of the Assumption all her life. Very active in the women’s group – Fanny Bondye (Family of God) – she has always had a smile and a positive attitude. She has never asked for anything special but when the selection committee of the community that decides who gets the next house advised her that she and her seven grand children would be getting a new home , she was overjoyed. The HMI version of “Extreme Makeover” has once again been made possible through the generosity of donors here in the US who wanted to share their blessings with someone less fortunate. It is with great joy that HMI begins construction of this house with hopes of it being completed in time for Christmas. What a great Christmas it will be for the Joseph family!
