

Haiti - House #163 Rose Marie Michel

Berese Michel (53 y/o) and her mother Rose Marie (70) have lived together in the shack you see in the "before" picture since they came back from Port-au-Prince (PAP) to Numero Deux after the earthquake. Mother and daughter have a very good relationship, walking every day back and forth to Jérémie where they would go to sell charcoal. Berese recently had surgery for cataracts which brought their little business to a halt for the time being. Rose Marie had three children and now lives with Berese who has six children but all are living with family members and friends in PAP. The selection committee chose these two women to receive a home in September 2019 with the hopes of the family being able to reunite. They send their prayerful thanksgiving to all who have helped bring about this miracle in their lives.
