

Haiti - House #167 The Wilguet Alcide Family

Wilguet Alcide and his wife Ketlene Pr sume, have two children living in the miserable place you see in the before picture. He is a farmer who has worked for the HMI construction team. She helps her husband as best she can to take care of the family working in the family garden and other daily duties. Their situation was so dire that the selection committee chose this young family to receive a new, safe and healthy home that can give them hope and dignity where their children can live, learn and grow in a decent environment. (Wilguet and Ketlene's house is built in Bec's s/d)
