

## **Haiti - House #168 The Thony Pierre Family**

**Mr. Thony Pierre is an 80 year old widower and father of 14 children. Besides his wife, he has also had to bury three of his children. He lives in this pitiful place you see in the “before” picture with six of his children as well as two of his grandchildren. His health is very poor, suffering now from prostate, eye, and blood pressure problems. Although a hard worker all his life, he is barely able to work anymore, being taken care of by his children. The selection committee has decided to build a new home for Mr. Thony, hoping that his health can improve and that he can be more comfortable. His family sends their deep gratitude for making this dream become a reality in November 2019.**
