

## **Haiti - House #188 The Milord Family**

**Marc-Hilaire Milord (34) and Exceline Louis (23) are pictured with their daughter and 2 of Milord's younger brothers. It's hard to imagine that this place you see in the “before” picture is where human beings must stay, however this family has been living here. Marc-Hilaire has been working for HMI's construction team as a mason for many years now. He began working with the team as a young boy. He is a very hard worker who cares for his family and is very conscientious regarding his daughter's education. His wife (as so many women in Haiti are) is a vendor of groceries and other little items she finds or raises in her garden. She also went back to school (before she and Marc were married) after being encouraged by Tete and Fr. Jomanas in order to be better prepared for the future. She comes regularly to church with her daughter. After seeing so many of these beautiful “Haiti Homes” be built for others, now Marc and Exceline will finally build one for themselves. What a blessing this will be to this young family. They send their prayerful thanks and appreciation to all.**
