

## **Haiti- House #221 Pierre Vichard Family**

**Pierre Vichard helps to set in place the concrete blocks used by the HMI construction masons to build the houses. His wife, Marie Flore Jeudi, is a devout catholic woman who has a little roadside stand where she does a little business, helping her husband in taking care of their young family. Their living condition has been very difficult, having to stay in a hot box of old tin pieced together to try to protect from the tropical rains and blistering sun. We're happy to be able to finally help them find a more decent life in May 2021 by building this hard working couple a new HMI home. They send their prayerful appreciation to all who helped to make this possible.**
