

House # 23 - Wilberne Pierre Family

The Wilberne Pierre Family was one of the families selected to receive an HMI sponsored home. Where they were living wasn't much better than no home at all, but it was all they had to call home. Soon after the picture of their hut was taken, their little two year old (pictured in front of the ashes) somehow carried a stick with fire on one end to the hut from the outdoor fire and in just a few minutes everything was ashes. Everything they owned was gone.

Again we give praise and thanks to God that we had funds to address this emergency. HMI was able to complete the new home in November of 2013 - a home that can't be burned down - and a home that will allow the little "culprit" a safe and healthy environment in which to grow.
