

## **Haiti - House #261 Gilot**

**Farana Gilot is a 28 y/o single mother of a very friendly little girl. She has been abandoned by the father of her child when she became pregnant. Farana herself was an orphan at a very young age when both parents died. As a result she could not stay too long in school. Now with a little girl on her arms, it is not clear how she managed to survive. Her brother has been living with her in the tarpaulin and sack covered hut you see in the “before” picture on a piece of property inherited from their parents. Thanks be to God, she has title to the property. Out of compassion and for better protection and security for the child, the HMI selection team has decided to build her a house in March 2022. To say that she is overjoyed would be a gross understatement. She, her brother and her daughter send their promise of prayers for the donors and thanksgiving from the bottom of their hearts.**
