

## **House # 31 - Saintanne**

**As you can see, as soon as Mrs Saintanne received the good news coming from HMI that she would be receiving a new home in June 2014, she began the demolition of her old house with the help of the neighbours and family members. She lives with her husband (who is very old, shy and not enjoying good health) and three of her grandchildren. She is a very courageous old woman (though frail and suffering from high blood pressure and diabetes) who frequently walks from Numero Deux to Jeremie's public market carrying on her head whatever she can find from her garden to make a living. She is also a member of the prayer group "Fanmy Bondye".**

**When she received the news that she'll have the new house. she exclaimed that thanks to the good hearts of the HMI people, she will finally be living in a more decent place that will allow much fresh air to come in and protect her from the intrusion of the rain. She said that she'll pray God to send you more money so that you can continue to help other people in her situation and particularly those from her prayer group.**
