

House# 59 - Rony Luc

Calypso has been a very special part of the HMI journey. From the very first days of HMI's entry into the community, Calypso was there to help. After a time, he became mentally and physically sick and was unable to help any longer. His mom and dad had a number of other children as well as other family members living in the pitiful house pictured here. The mom's health has deteriorated and she finds herself needing to spend most of her day in a wheel chair. The new house will be more wheel chair accessible and afford much more safety from the elements as well as be a much healthier environment. Thanks to all who made this "miracle" possible.
