

The prison report for January is very simple yet powerful. After being notified in late December 2017 that the well at the prison that had been drilled by HMI in the Fall of 2009, Fr. Joe along with our technician, Gary Bazard, went to the prison, assessed the situation, made temporary repairs but determined that the pipes in the well needed to be replaced. The following is the simple statement received on January 2nd from Fr. Joe.

**Deacon. The pipes have been replaced and the pump resumes pumping even more water now. PTL !
Fr. Joe**
