

# Numero Deux School Well

The well at the ND school furnishes safe, potable water to the 350 elementary school children that attend school there. There are also secondary school children that attend in the afternoon and as well as some vo-tech students in the evenings and weekends that benefit from the well. There are about 1000 people living in the proximity of the well that also benefit from it. Thanks to Rotary International who raised the funds for this well.
