

## Bec's Well

After being down because of problems with the pump and ultimately requiring another well to be drilled, the community across the airstrip once again has a water source close at hand in memory of Rebecca Claire Fakier. November 2018

This well was funded by friends and family of Rebecca Claire Fakier. [Click to see her story.](#) The community served by this well was isolated from nearby fountains by the airstrip in Numero Deux which serves the Jeremie region. As many as 500 people now have access to water that previously required children to walk considerable distances to fetch water.
