

Well # 23 - Mackandal Well

The Mackandal well was funded by the Rotary Clubs of Baton Rouge and HMI. This well is in one of the more desperate slum areas of Jeremie. There were water fountains in this area at one time but they have long fallen into disrepair. After the January 12th, 2010 earthquake there have been some initiatives to build houses in the burgeoning community – most notably by the Haitian Health Foundation but there still was a pressing need for potable water. HMI is extremely pleased that they were able to partner with the Rotary Clubs of Baton Rouge to be able to bring a source of potable water to the families of Mackandal.
