

## **Well # 28 - Gattineau Well**

### **The Friends for Health in Haiti**

**The Haiti Mission (HMI) was able to use their equipment and expertise to contract with the [Friends for Health in Haiti \(FHH\)](#) to drill this well in Gattineau. FHH raised the funds to build a brand new and larger medical clinic in Gattineau under the direction of Dr. Wolf. This clinic will provide health care for entire area and runs year round. Each new well that HMI drills, brings joy to all of us to know that another community will have water but it is especially gratifying when we can bring water to a medical facility in a community. The greatest medicine in the world is potable water.**
