

Haiti – Well #54 Mt. Carmel Church and School Well Fond Rouge

Mount Carmel school is located in the community of Fond Rouge which is nestled high in the mountain range outside of Jeremie, Haiti. Although there are a large number of families living in this village, these children and their families have never had a water source readily available. Most of these children at the school were spending literally hours a day fetching water rather than being able to play and study as children should be able to do. When HMI learned of the plight of this “hidden world”, we were able to secure funding and move our rig to a location near a large cluster of families. When we saw the enormous number of people spread out in this area, we were able to secure additional funding. These children will now have water at their school, being able to play and study like children should be able to do rather than have to walk long distances to fetch water. Thanks to all who helped in any way to make this miracle a reality.

As of July 2017, thanks to the grace of God and the kindness of our donors these school children now have water at their school and for their families.
