

## **Haiti – Well #59 – Brian’s Well**

**Brian Schmidt, an HMI donor and supporter from Canada, had been working with Rio Cave’, a Haitian National from Jeremie with agronomy training and good English language skills, to develop a small community farm that could eventually export products to Canada and beyond. The need for a substantial and dependable water supply was essential to the farm’s success. In December, 2018, the HMI drill team was able to drill a well which produced a very good quality and a large quantity of water. HMI hopes and prays that this well can be an additional catalyst and blessing to help Brian’s dream for Rio and the area become a reality.**
