

Clerie Ice Factory

Clerie Ice Factory – Haiti Mission, Inc. entered into a contract with Mr. Gene Clerie to drill a well at the site of a proposed ice factory. HMI is very interested in aiding private interest who will add to the development of any region of Haiti. At the time, the ice that was available in Jeremie was being shipped in. The quality of the ice and the source of the water was not certified. We are delighted to report that this project reached fruition with the first ice being produced in August 2010. Jeremie now has an alternate source of ice from a certified source of potable water.
