

Holiday Decorating Safety

Some of the most memorable times of Christmas are the sights of trees aglow, outdoor lights, and a warm fire. As you are decorating for the holidays, the Faith Community Health Team would like to remind you to keep potentially poisonous plants like mistletoe and amaryllis away from children. Also use only artificial trees and lights labeled fire resistant and in good condition. Place any tree or decoration at least three feet away from fireplaces, radiators, and other heat sources. Keep all exit doors free. For more information visit <https://www.cpsc.gov/s3fs-public/611.pdf>
