INSURANCE AGENTS REPORT

Brother Matthew Maurin

Are you frustrated with paying yearly income taxes on savings that are intended for long term goals? Then it's time for you to get the information on the strategies that can provide tax advantages on your money. In our early working years, working years we made money to pay our monthly bills. Shortly thereafter, we began saving for our first home. But during our middle years we began to realize the seriousness of putting aside money for longer-term objectives. That's why many people embrace financial strategies that not only have the potential of building value for your future financial goals, but may also provide beneficial tax advantages during their growth phase and during the distribution phase. It's important to save money, because some long-term goals don't offer second chances. But it's also important to embrace tax advantaged strategies when available - ones that have the ability to potentially reduce defer or even eliminate taxes. With so much to gain ask for the facts. The facts may illustrate ways for you to achieve tax advantages on money or setting aside for longer term objectives. That's a strategy that has the potential of delivering a big advantage to the quality of your financial life.

As always if you have any questions please contact me.

WIFE VS. HUSBAND

A couple drove down a country road for several miles, not saying a word.

An earlier discussion had led to an argument and neither of them wanted to concede their position.

As they passed a barnyard of mules, goats, and pigs, the husband asked sarcastically, 'Relatives of yours?'

'Yep,' the wife replied, 'in-laws'
