

*St Paul has a new Parish app to help keep us informed and connected! It can be installed on your smartphone to be accessible wherever you go.*

The app will contain basic information for St Paul, such as Mass times and announcements. You may subscribe to notifications to receive timely messages from the church, such as upcoming services, social functions, and changes in activities due to weather or other emergencies. Church groups may also use this app to communicate and coordinate their activities.

It is free and easy to subscribe.

- Download the WeConnect Parish App from your App store.
- Open the app and select "More" at the bottom right.
- Under "Your Parishes", add Saint Paul Catholic Church. If you have trouble finding it, you can search using our zip code, 35611. If you decide to add other churches that also use this app, be sure that St Paul is your home church, so that you can get our announcements.
- If you would like to receive timely messages about Church activities, open the app, select "More", then "Message Settings", then "Saint Paul Catholic Church", and turn on general announcements. As church groups begin to use the app for their activities, you can sign up for their notifications here also.
- If you sign up for these general notifications, you will receive a notice on your phone when the Church sends a message. Message history may always be accessed under "Messages" at the bottom of the app.

*Please consider signing up for this app. It will help our Parish stay better informed and connected.*
