

“I believe God has blessed each and every one of us with a unique set of gifts. It is up to us however to discover our own true potential and put it to use enriching our lives and those around us. We need to be vigilant in taking opportunities to fully develop not only our gifts, but to identify occasions where we can aid those around us in their own journey achieving their full potential.”

For the past 10 years I have been teaching at Immaculate Conception School. I started out teaching middle school science. Until this opportunity, I never fully realized just how much I love this subject area! Over the years I have remained in this concentration area, yet now teaching all subjects excluding social studies.

I have grown up in Clarion Area graduating from Keystone High School. I then attended Clarion University earning my Bachelor’s degree in Elementary Education with a concentration in social sciences. I substitute taught for two years gaining a great wealth of experience at the local public schools. After I was hired at I.C. I again attended Clarion University earning my Master’s Degree in Science Education. When I am not in the classroom I thoroughly enjoy spending time outdoors in the limited but beautiful sunshine here in Clarion County.

What makes Immaculate Conception School special is that we are a family of learners. We all work together and support one another. There is a true atmosphere of respect between us all, faculty and students. We all journey together making each and every day better than the last.
