## Caregivers and Pulmonary Fibrosis

**Do you or a loved one suffer from Pulmonary Fibrosis?** If you've been diagnosed with Pulmonary Fibrosis you will at some point need a caregiver. Please consider how you want your caregiver to care for themselves and the ways you need them to care for you. **You are invited to share your questions and thoughts as we gather for:**

- ◆ Lunch
- ◆ Caregivers Slide Presentation
- ◆ Q & A Following Presentation

Presented by Brandi Haberer, RN, MSN  
IPF Clinical Educator

**If you or a loved one has been affected by pulmonary fibrosis, you are invited to attend our support group.** Participating in a support group may improve your emotional well-being and have a positive impact on your health by offering you an opportunity to connect with others who are facing similar experiences, obtain practical information, and to receive support.

Support groups can also be a valuable resource for your caregivers, other family members, and friends. Please remember, a support group should not replace treatment from your doctor.

## NOT EVERYONE BREATHES EASY!
