Understanding Pulmonary Fibrosis

Do you or a loved one suffer from Pulmonary Fibrosis? Pulmonary Fibrosis is more prevalent than breast cancer, yet there is little awareness of this disease or support for those who suffer from it. St. Joseph Health Ministry wants to help change that. **You are invited to join us for:**

- ◆ Lunch
- ◆ Round Table Discussion
- ◆ Pulmonary Fibrosis Slide Presentation
- ◆ Q & A Following Presentation

Presented by Linda Neubacher, RN, BSN
IPF SSc-ILD Clinical Educator

If you or a loved one has been affected by pulmonary fibrosis, you are invited to attend our support group. Participating in a support group may improve your emotional well-being and have a positive impact on your health by offering you an opportunity to connect with others who are facing similar experiences, obtain practical information, and to receive support.

Support groups can also be a valuable resource for your caregivers, other family members, and friends. Please remember, a support group should not replace treatment from your doctor.

NOT EVERYONE BREATHES EASY!
